

Equipment Highlights

LED Display

Easy-to-read and bright LED display with minimal power consumption.

3 speed levels

low, medium, high

Timer

12 hours mode and switch on and off according to the desired time.

3 wind modes

Normal, nature and sleep modes

Oscillation function

The vibrations help the cold air to reach different areas of the room.

Ion cleaning function

Cleaning the ambient air

Cooling effect

Due to the strong performance of the tower fan

Österreichische
Marke

The Be Cool tower fan is the perfect combination of design, performance and quality.

It has an easy-to-use control panel with LED display and infrared remote control.

3 speed levels - low, medium and high - and the oscillation function guarantee cooling in the summer

Furthermore, it also has 3 wind mode settings: normal, nature and sleep mode.

The timer function allows the control of up to 12 hours of uninterrupted cooling time. However, it also allows the automatic switch-off to be set.

This tower fan has a Negative-ion cleaning that can detect the air environment at any time and automatically adjust the cleaning performance so that you can enjoy clean air.

Safe and easy

The tower fan is easy to operate manually at the top of the control panel. The large 1.4 m long power cable facilitates the positioning of the fan. The fan has a high quality certified 45W motor.

Ionization

The built-in ionizer produces negative oxygen ions, which purifies the indoor air in addition to the cooling fan function and supplies it with fresh air. Negative ions attach themselves to dust particles, microorganisms and other unwanted particles in the air and bind them together. These particles become heavier than the air, fall to the ground and are filtered out of the air in this way.

Scope of delivery

1x remote control incl.
Battery (CR2025)
1x User manual

Guarantee

2 years

Specifications

Touch Panel

LED Display

In addition to the room temperature, the large LED display also shows the most important functions. All functions can be easily and intuitively controlled on the touch panel.

- Input voltage: 220V~240V
- Frequency: 50 Hz
- Power: 45 watts
- Standby: 0.045KWH <1W
- Height: 121cm
- Speed levels: 3
- air velocity: 7.1m/sec
- Noise level: 50 dB(A)
- 3 wind modes: normal, natural, sleep
- Air circulation: 960 m³/h
- Swivel function
- Ionizer
- 12 hours timer function
- Sleep mode
- Storage compartment for remote control
- Sturdy housing
- large LED display
- Temperature and function display
- Color: White
- Dimension WxHxD: 315x1210x315 mm
- Weight: 3.5 kg
- EAN: 9005151001044
