

Highlights

- **Humidification functions**
Cold air humidifier or warm air humidifier
- **Room size**
Suitable for up to 50 m²
- **Large tank**
Capacity 4 litres
- **Humidification level adjustable**
between 40-80
- **Simple operation**
via touch panel on the unit or remote control
- **Separate aroma compartment**
Aroma oil usable
- **Limescale filter, ION filter and HEPA filter**
Includes

ION filter

The anti-bacterial effect of silver ensures optimum water quality.

HEPA filter

This cleans the room air and frees it from bacteria, germs and viruses.

The purer the aroma oil, the more effective it is.

Essential oils are particularly effective and productive. Provided the quality is right. Therefore, the bottle should be labelled "One hundred percent essential oil".

Wellness atmosphere for your home!

The decorative humidifier and diffuser by BE COOL combines three functions in one device:

Air humidification cold air & warm air + air purification + aroma diffuser.

Air humidification

With its micro-fine spray mist, it humidifies the room air and thus ensures a fresh room climate.

Air purification

Thanks to the integrated filters (limescale filter, ION filter and HEPA filter), the BE COOL humidifier is particularly allergy-friendly. It cleans the room air and water and frees them from bacteria, germs, micro-organisms and viruses.

Aroma diffuser

The aroma function is easy to activate. Put a few drops of your favourite oil in the aroma compartment and activate the humidifier.

A room fragrance has an enormous influence on body and mind. It can invigorate the organism, awaken pleasant memories or stimulate creative thinking. Moreover, it creates a cosy atmosphere in the bathroom as well as in the bedroom or living room and invites you to relax.

The compact BE COOL humidifier and diffuser can be used with or without aromatic oil.

Display

The built-in LED display with touch panel provides information about the relative humidity and the current room temperature, and the 10-hour timer allows you to set the operating time of the humidifier.

Innovative tank filling system

With this model, the water is poured into the tank from the top and not through a hole in the bottom, as is the case with most devices of this type. In addition, the tank can be filled in two ways. It can be removed from the appliance and placed directly under the tap, or you can pour water into it from a filter jug or bottle, for example.

Volume

Modern ultrasonic nebuliser technology for air humidification is almost silent, making it perfect for your bedroom.

Nebuliser technology

Thanks to effective high-frequency technology, the water is converted into micro-fine mist and released into the room air by a fan.

Filter replacement

To ensure optimal function, we recommend replacing the filter every 2 months.

Scope of delivery

- Humidifier
- Limescale filter
- ION filter
- HEPA filter
- Remote control incl. battery
- Operating instructions

Warranty period

- 2 years
