

Equipment Highlights

Heating function

1000 watts of heating capacity for up to 10 m²

3 speed levels

low, medium, high

Intern Oscillating

The oscillating function distributes the cooled air optimally into all areas of the room.

Kühleffekt

Cools the room air by up to 8°C.

Purifier

The sucked air is washed through the filter. Dust, pollen, mites as well as bacteria and unpleasant odours are filtered out of the air.

Anion

Ionizers in air purifiers produce negatively charged ions (anions) that connect to larger clusters with positively charged dirt particles in the room air.

9.3 litres water tank

Operation possible for up to 13 hours.

Refreshing 4in1 air cooler with cooling, heating, air purification and humidification function

The powerful air cooler ensures a pleasant cooling in your home.

Thanks to the innovative, natural cooling technology, the device is energy-saving and releases cooled and cleaned air into the room. Ideal for living areas where no expensive air conditioning is required.

In the cold season, the device proves itself by the built-in heating function (optional with or without air humidity) for rooms up to a maximum size of 10m².

3 speed levels combined with the various functions (cooling, ventilation, air purifying) give you full freedom over the intensity of cooling.

Another highlight of the device is the air purification via an ionizer. The ionizer develops negatively charged ions (anions) that connect to larger clusters with positively charged dirt particles in the room air and eventually fall to ground.

Product highlights:

Heating

Remote control

Special fan sheet

50% more air circulation

Anion for air purification

9.3 litres water tank for 10-13 hours

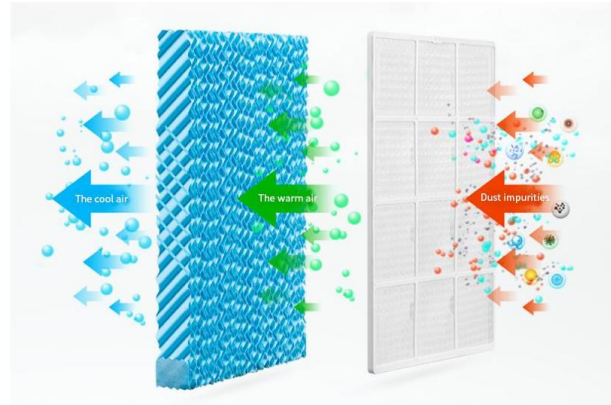

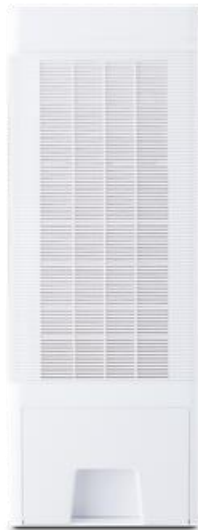

Easy to move with rollers

Touch-Panel

Air Cooling & Honeycomb Filter

Air coolers suck the heated room air on one side and then guide it through a honeycomb filter in which cold water is present as a coolant. The water in the cooling system evaporates slowly, absorbing heat from the air flowing through the room. Afterwards, a fan blows the now cooler room air back into the room.

Dust filters, honeycomb filters and the anion function allow people with allergies to operate appropriately and thus ensure the perfect indoor climate.

Air Cleaning & Humidification

In addition to cooling the air, the air cooler differs from conventional fans in that the air is moistened and cleaned. After the summer season, the device can also be used as a humidifier.

A touch panel on the top of the device allows for individual operation and completes the extraordinary design of our air cooler with its modern look.

Technical data

- Air cooler and heater
- Air traffic 760 m³/h
- Area of action 10 m²
- Power Consumption 1,100 Watt (4.8 A)
- Water tank volume 9.3 liters
- Operating time with full tank 10 - 13 hours
- Water evaporation 0.7 to 0.9 liters per hour
- 3 levels
- Touch control panel
- Air purifier with ionizer (anion)
- Special rotor blade
- Rollers
- Easy to fill barable water tank
- Incl. remote control
- Dimensions W/H/D: 28 x 75 x 25 cm
- Colour: White
- Weight: 6.0 Kg
- EAN: 9 005 665 025 222

Content

- 1x Remote control
- 1x rollers with locking function
- 1x User Manual

Warranty period

2 years
