### Scooter carrying bag - robust and variable

The BE COOL Scooter carrying bag made of high-quality nylon (1680D Oxford fabric) is extremely robust as well as water- and dirt-repellent. The high quality provides ideal protection against scratches or other damage when your scooter is transported.

### Flexible customizable and lightweight

In this scooter carrying bag, different sized e-scooters fit in. It can be made bigger or smaller with a zipper. The length is adjustable between 105, 115, 120 and 130 cm. This thoughtful design has been specially developed for Be Cool Scooter but can be used for any product with similar dimensions.

The scooters can be taken anywhere in this carrying bag, whether to the office, on public transport or in the car. The clothes stay clean, and the dirt of the scooter stays in the bag. At only 625g, it is lightweight and can also be folded together in a small handy way.

### Convenient wearing and stowage

Thanks to the wide and reinforced shoulder strap, the scooter can be comfortably worn. The length of the shoulder strap can be attached.

The carrying bag is foldable and can be conveniently attached to the handlebars while driving with the e-scooter.
