1680D Oxford
- **Protects the scooter**  
Water and dirt repellent
- **Low weight**  
Only 1200 gram

### Scooter carrying bag - robust and variable

The BE COOL scooter carrying bag is made of high-quality nylon (1680D Oxford fabric) and is robust as well as water- and dirt-repellent. The high quality offers ideal protection against scratches or other damage when transporting your scooter.

### Flexible, adaptable and lightweight

This scooter carrying bag fits different sized e-scooters. It can be made larger or smaller with a zip. The length can be adjusted between 105, 115, 120 and 130 cm. This sophisticated design is specially developed for our BE COOL e-scooters, but can also be used for any products with similar dimensions.

The scooters can be taken anywhere in this carry bag, whether to the office, public transport or the car. The clothes stay clean and the dirt of the scooter stays in the bag. At only 1200g, it is light and can also be folded up handy.

### Comfortable carrying and stowing

Thanks to the wide and reinforced shoulder strap, the scooter can be carried comfortably. The length of the shoulder strap can be adjusted.

The carrying bag is foldable and can be practically attached to the handlebar - while riding the e-scooter.
