- LED with room temperature display
- Power consumption up to max. 1800 watts
- Two power levels
- Completely silent operation
- Thermostat +5 to +45 °C
- Timer function
- Overheating protection
- Remote control
- WiFi with app control (also with Amazon Alexa and Google Assistant)
- Suitable for wall and ceiling mounting

With the SHX dark radiant heater, annoying, insect-attracting light is a thing of the past.

The SHX infrared dark radiant heater has a maximum heating power of 1800 watts and impresses with its high-quality, robust workmanship made of aluminium. The internal thermostat allows convenient setting of the target temperature in the range from +5 to +45 degrees.

Due to the attached blind, the infrared rays of the dark radiator are not so intense, the dark radiator only emits heat and no light. Completely silent operation and no dust formation - perfect for noise-sensitive areas and allergy sufferers. In practice, users therefore find the heat generated by dark radiators more pleasant.

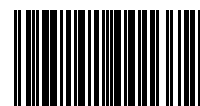

The robust, powder-coated aluminium housing is weatherproof thanks to protection class IP54 - for use indoors and in conservatories. The design allows for easy wall or ceiling installation.

Österreichische
Marke

This product is designed for indoor and sheltered outdoor use.

In outdoor areas, the heat output may decrease considerably.

Technical changes, errors and colour variations excepted.
