

Highlights

3 wind modes
Normal, Natural,
Sleep

3 in 1
Air cooling,
purification and
humidification

3 speed levels
low, medium, high

Simple operation
on the unit or with
the remote
control

Swivel function

The swivel function optimally distributes the cooled air to all areas of the room.

Cooling effect

Cools the room air by up to 8°C.

Refreshing 3in1 air cooler

with air purification and humidification function

The powerful air cooler provides pleasant cooling in your home.

Thanks to the innovative, natural cooling technology, the device is energy-saving and releases cooled and purified air into the room. Ideal for living areas where an expensive air conditioner is not necessary.

3 speed levels combined with the different functions (cooling, ventilating) give you full freedom over the intensity of cooling.

Climate-friendly operation

This type of cooling is a completely natural and cost-effective cooling method. Air coolers reduce the room temperature by means of the natural principle of water evaporation.

Air cooling & honeycomb filter

Air coolers draw in the heated room air on one side and then pass it through a honeycomb filter containing cold water as a coolant. The water in the cooling system slowly evaporates and absorbs heat from the room air flowing through. A fan then blows the now cooler room air back into the room.

Air purification & humidification

In addition to cooling the air, the air cooler differs from conventional fans in that the air is humidified and purified. After the summer season, the unit can also be conveniently used as an air humidifier.

Air purifier

The air drawn in is washed through the filter. Dust, pollen, mites as well as bacteria and unpleasant odours are thus filtered out of the air.

Scope of delivery

- Air cooler
- Cooling batteries (2x)
- Remote control incl. battery (CR2025)
- Operating instructions

Warranty period

- 2 years

The water tank is refillable on the underside

The cooling batteries provide additional cooling

The air cooler filter cleans the air

Drain for emptying the water tank

Specifications:

- Power consumption: 65 watts @ 220V~240V/50Hz.
- Water tank capacity: 20 litres
- Air circulation: 588 m³/h
- Three speed settings and swivel function
- Wind modes: normal/natural/sleep
- Robust housing with castors
- Colour: white

Dimensions:

- Product (W×H×D): 370×690×320 mm
- Packaging (W×H×D): 415×760×365 mm
- Net/gross weight: 7.1 kg / 9.4 kg
