Premium convector heater with 2000 watts

The SHX 2000 Watt Premium convector heater provides fast and effective heat distribution for any room.

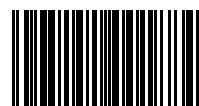

Due to its quiet operation, it does not disturb your daily activities and the integrated overheating protection ensures safety. You can control the heating easily and conveniently via the LED display, the operating buttons and with the remote control.

The 24-hour timer allows you to switch off the heater automatically after a set time. Choose a temperature between 5 and 50 °C and enjoy full control over the temperature in your home. The heating convector is equipped with wheels so that it can be easily transported from room to room.

Get the 2000 Watt heating convector from SHX now for maximum warmth and comfort in your home!
