-  1-8 h timer
-  Overheating protection
-  Anti-tipper
-  Remote control

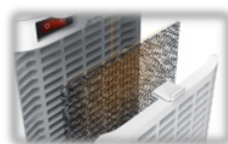

### PTC ceramic fan heater 2000 watts

The stand fan heater SHX37PTC2000LD is a true all-rounder. Suitable for rooms up to 25m<sup>2</sup>, it has three power levels (ventilation function / 1000 watts / 2000 watts).

The built-in electric thermostat allows the desired temperature to be set in the range 10 °C - 35 °C. An air filter built into the back is removable and washable - dust can be reduced even further in addition to the long-lasting PTC ceramic heating technology - not only a plus point for mite allergy sufferers!

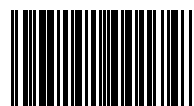

The swivel function distributes the air evenly, the overheating and tilt protection testify to the high safety standard. All functions can be conveniently controlled on the unit or via the supplied remote control.

Air filter removable  
and washable
