

Technical data

Input voltage

230 V - 250 V

Frequency

47 Hz - 63 Hz

Power consumption

Max. 16 A / 3680 W

Battery

3.6V NI-MH

Accuracy

+/- 2%

Voltage display

0.0 V - 9999 V

Current consumption display

0.000 A - 65.00 A

Power consumption display

0.0 W - 9999 W

kWh display

0.000 kWh - 9999 kWh

Energy cost display

0,00 - 99,99

EAN

9005151008072

Scope of delivery

Energy cost meter

Operating instructions

Warranty

Warranty period

2 years

Monitor energy, save energy, minimise costs!

With the new energy cost meter from SHX, you always have your electricity consumption under control.

The large LCD display shows all relevant data such as current, voltage and power at a glance. Simply and conveniently set the parameters and costs per KW/h - you already have the costs for your computer in the home office or the standby consumption of your TV under control. The maximum load is 16 amps, 3680 watts - This means that even larger devices can be monitored.

The built-in rechargeable battery means that your data will always be saved, even if there is a power cut or the unit is moved.

Only for use in dry rooms!
