with 7 different colours to choose from

### Mini USB wind machine with cooling battery - the perfect companion for travelling!

With an output of 10W, it provides an effective air flow with a diameter of 15 cm. The unique cooling function makes it possible to use a cooling battery to make the air even more refreshing.

The wind machine has three adjustable speed levels, allowing you to customise the intensity of the airflow to suit your personal preferences. It is operated via a practical USB-C connection, which enables convenient and flexible use, whether on a computer, with a power bank or on other USB-enabled devices.

The integrated LED night light and ambient lighting with 7 colours create a pleasant atmosphere in your room. This versatile mini USB wind machine is not only functional, but also a stylish element that enhances both your personal refreshment and the design of your living space.
