**Waterproof**  
according to IPX6

**AUX-In**  
3.5 mm jack

### High-quality sound on the go to the point

With the Sound-Dot, you can enjoy music wherever you are and it easily becomes your ideal companion.

The waterproof design (IPX6) makes this handy speaker the perfect all-rounder in any weather and anywhere.

Continuous music enjoyment of up to 8 hours thanks to the powerful 1,200 mAh battery.

The SD card slot and the USB playback function enable music playback without an external source and thus further increase flexibility.

Despite the handy design, the speaker surprises with deep, powerful bass!

### Multifunctional playback options

Experience music as if you were there live. No matter where the music comes from. Connection options via Bluetooth, Micro-SD or AUX connection possible. There is also a USB playback option.

### Hands-free function

Make phone calls comfortably and easily. Connect the smart phone to the Soundtube Drop and communication always works perfectly. Always one hand free and this with an optimal voice quality.

### Dual Pairing

Connect 2 Soundtube Drops to achieve an outstanding sound experience. The True Wireless Stereo function synchronises the left and right audio channels. This room-filling stereo sound is a delight.

### FM radio

The built-in FM tuner has a station search function and is intuitive to use. The included micro-USB cable can be used as an antenna to boost reception.

### Passive cone system

Due to the low mechanical losses, the subwoofer thus has high detail fidelity and extreme dynamics.

For demanding applications, passive cone technology is usually the best solution to keep the enclosure size small and still get the full range of sound.

The weights of the passive diaphragms are precisely matched, thus guaranteeing a dynamic and powerful sound image.

### **Scope of delivery**

- Bluetooth Speaker
- Micro USB charging cable
- Instruction manual

### **Warranty period**

- 2 years
