12 hours
- **With 120° oscillation**
Even distribution of air in the room
- **Removable and washable filter**
For clean and healthy air quality
- **Maximum safety during operation**
Overheating protection and tilt protection

Experience the perfect combination of efficiency and comfort with this modern table fan heater.

With an output of 2200W and a high-quality ceramic heating element, this appliance provides quick and efficient heat.

Thanks to the switchable heating and cooling mode, the table fan heater can be used all year round. You can choose from four different levels for heating and cooling and set the temperature between 20°C and 32°C.

The digital touch control panel and the supplied remote control allow simple and convenient control.

The LED display keeps you informed of all settings at all times. The 12-hour timer allows you to plan operation according to your schedule, while the 120° oscillation ensures even air distribution. The elegant metal housing not only gives the fan heater a stylish look, but also ensures robustness and durability.

The removable and washable filter ensures clean and healthy air circulation. For maximum safety, the fan heater is equipped with overheating protection and anti-tilt protection, guaranteeing a safe user experience.
