- Automatic horizontal and vertical oscillation**
 Automatic horizontal and vertical oscillation ensures even air distribution in the room
- Water filling methods**
 automatic self-refilling via the water pipe or manual filling with a bucket
- Protection function when the water tank is empty**
 a protective function that is activated when the water tank is empty to prevent damage

This powerful premium air cooler has been specially developed to effectively cool the air in large areas such as halls or shops. With an output of 250 W and an impressive maximum air flow of up to 3175 m³ per hour, this air cooler ensures pleasant refreshment even in spacious areas.

Thanks to its generous water tank, which holds 52 litres (at min/max), this air cooler is ideal for use in high-traffic environments. The tank can be filled manually with a bucket or automatically via a water pipe, providing a flexible and convenient refill option. An integrated protection function prevents damage to the pump due to an empty water tank and ensures safe operation.

The air cooler is equipped with 3 speed levels and reaches a wind speed of up to 9 m/s, allowing you to always select the optimum setting for your environment. The automatic horizontal and vertical oscillation distributes the cool air evenly throughout the room and ensures comprehensive cooling.

The integrated LED display and the user-friendly control panel make controlling the appliance particularly easy. The 12-hour timer allows you to plan and customise operation according to your wishes. The remote control supplied enables convenient remote control.

Whether in large halls, shops or restaurants - this premium air cooler offers a powerful and reliable way to cool the air. Create a pleasant atmosphere for your customers and employees and enjoy refreshing cooling on hot days.

Scope of delivery

- Premium air cooler
- Remote control
- Operating cable

Warranty period

- 2 years

Specifications:

- Voltage: 220-240 V ~ 50 Hz
- Power: 250 W
- Water tank capacity: 52 litres (between min. and max.) / 60 litres
- 3 speed settings
- Air range: up to 22 m
- Maximum air flow: 3175 m³/hour
- With LED display and control panel
- With 3 honeycomb filters (2 at the side, 1 at the back)
- Timer: 1-12 hours
- Noise level: ≤ 75 dB(A)
- Horizontal and vertical oscillation
- Self-refilling via water pipe or
Manual refilling with bucket
- Water connection: Ø 13.6 mm
- Protection function for empty water tank
- With remote control

Dimensions:

- Product (W×H×D): 778×1182×494 mm
- Packaging (W×H×D): 850×1265×565 mm
- Net/gross weight: 20.8 kg / 25 kg
