

Highlights

- **Efficient dehumidification**
Removes up to 300 ml of moisture from the air per day - ideal for small rooms.
- **1-litre water tank**
Offers sufficient capacity
- **3 operating modes**
Selectable between *Low*, *High* and *Sleep* for flexible use as required
- **Timer function**
Can be set to 6, 12 or 24 hours
- **7-colour LED light**
Provides atmospheric lighting and can be used as a night light
- **Safe operation**
Automatic switch-off when water tank is full prevents overflow
- **Portable design**
for easy transport from room to room

This compact mini dehumidifier combines modern design with efficient performance and is ideal for smaller rooms. With a daily dehumidification performance of up to 300 ml, it reliably ensures a pleasant room climate and protects furniture and textiles from excessive moisture. The integrated water tank holds up to 1 litre and switches the appliance off automatically as soon as it is full - for safe and low-maintenance operation.

Thanks to three selectable operating modes - including a sleep mode - the mode of operation can be customised. The timer function for 6, 12 or 24 hours not only increases convenience, but also saves energy. The LED light in seven colours also creates a pleasant atmosphere in the room and can be used as a discreet night light.

It is operated via a clear LED display that shows the most important settings at all times. The quiet operation, reliable dehumidification performance and portable format make this dehumidifier a practical solution for many areas of application - from the bedroom to the walk-in wardrobe.
