

Highlights

- **Height**
117 cm
- **Power output**
50 watts
- **Individually adjustable**
3 speed levels,
3 wind modes
- **70° swivelling function**
for optimum air
distribution in the room
- **12h timer**
for convenient and
energy-saving switch-off
- **with remote control**
for easy operation
from a distance

This 117 cm high tower fan distributes the air in the room evenly and thus contributes to a pleasantly balanced feeling in the room.

It offers three wind modes (normal, nature and sleep) and three speed settings so that the air flow can be precisely adjusted to personal requirements. The 70° oscillation moves the air across a wide area of the room so that every area is reliably reached.

An integrated 12-hour timer enables automatic switch-off and supports efficient operation. The remote control supplied can be conveniently inserted and then stored in the separate compartment at the top of the fan.

Thanks to its slim design, the device blends harmoniously into any living space, while the high-quality PP plastic housing ensures a long service life.
