

Highlights

- **2000 W heating output**
Fast and efficient heating of living spaces
- **Contemporary fabric design**
Flame-retardant fabric cover for an elegant look
- **Electronic thermostat**
Temperature control from 5–35 °C for optimum comfort
- **3 heating modes**
Eco, Comfort and Frost Protection for energy-efficient heating
- **Two power settings**
Selectable between 1200 W and 2000 W
- **Window-open detection**
Automatic adjustment of heating output to save energy
- **High safety**
With overheating protection, anti-tip protection and child safety lock

Lieferumfang

- Convector
- User manual
- Feet

Garantiezeit

- 2 years

This convector heater combines modern heating technology with a contemporary, elegant design. The high-quality, flame-retardant fabric cover gives the unit a cosy look and blends harmoniously into any living or working space. Thanks to its powerful convector technology, it ensures rapid and even heat distribution.

With a maximum output of 2000 watts, the convector is perfect for living rooms, offices, bedrooms or holiday homes. The electronic controls and built-in thermostat allow you to conveniently set the desired room temperature between 5 °C and 35 °C.

The convector heater offers three operating modes – Eco, Comfort and Frost Protection – for optimum energy efficiency and personalised comfort. The built-in open-window detection automatically reduces the heating output as soon as a sudden drop in temperature is detected.

Additional safety is provided by overheating protection and a tip-over protection feature, which switches the unit off immediately should it tip over. The child lock prevents accidental changes to the settings.

Thanks to the included feet, the unit can be positioned flexibly anywhere in the room and is ready for use straight away.

Specifications:

- Voltage: 220–240 V~ 50/60 Hz
- Max. power: 2000 watts
- 2 power settings: 1000 / 2000 W
- 3 operating modes: ECO / Comfort / Frost protection
- Heating element: Wire heating element
- Electronic control unit with display
- Adjustable thermostat: 5°C – 35°C
- 24-hour timer
- Modern design with a fabric cover made from fire-retardant material
- Open-window detection
- Overheating protection
- Anti-tip protection
- Child safety lock
- Feet included

Dimensions:

- Product (W×H×D): 525×325×189 mm (with stand) / 525×275×105 mm (without stand)
- Packaging (W×H×D): 600×370×140 mm
- Net/Gross weight: 2.5 kg / 3.5 kg
